Dear Source Water & UIC Section Ryan Hancharick,

I implore you to DENY the proposed Plum Injection Well, Sedat #4A. Injection Wells like this put drinking water at risk. Sedat #4A is close to the water supply intake for many Allegheny County residents like myself. I'm concerned that municipal water sources are not tested for contamination introduced by injection well facilities. If my public water becomes contaminated, I will likely be exposed and experience health impacts long before my drinking water is tested and procedures put in place to remediate contamination. Please do not put our drinking water at risk.

Sincerely,

Non-responsive based on revised scope.
